A-LINE KNEE AND SHIN GUARD

SIZE: S/M - L/XL

TECHNICAL PROTECTION

An ultra-light, ergonomically contoured knee and shin protector the A-Line incorporates asymmetrical panels for precision fit and increased maneuverability. A triple Velcro system ensures the secure, customized closure of protection which incorporates a breathable stretch mesh sleeve for improved comfort performance on long rugged mountain rides.

A-LINE KNEE AND SHIN GUARD KEY FEATURES

- Highly flexible, multi-material knee and shin guard constructed from durable poly-fabric outer, breathable laminated impact foam and 3D stretch mesh.
- Lightweight and strong polymer protectors are vented to improve airflow and cooling performance.
- Breathable knee sleeve constructed from vented Neoprene and stretch mesh for secure fit and to promote ventilation.
- 3D mesh inner lining gives high levels of skin comfort, moisture-wicking and breathability.
- Protection paneling incorporates an intelligent flex bridge system for enhanced flexibility around knee articulation.
- Guards are asymmetrical and streamlined and are profiled for precision fit on specific left and right sides.
- High-absorption bio-foam padding gives added impact dispersion in critical impact areas.
- Triple Velcro system for a highly customized and secure fit and to limit protector displacement in the event of an impact. System includes a mid-strap strategically positioned to secure comfortably over calf.
- Silicone printing in inner knee sleeve helps keep guard in place.
