## MTB BIONIC JACKET FOR BNS

SIZE: S-2XL

TECHNICAL PROTECTION

The MTB Bionic Jacket for BNS integrates lightweight, ergonomically profiled protectors on the shoulders, arms, chest and back into its breathable mesh construction for unsurpassed body protection. The jacket is designed to accommodate the Bionic Neck Support, enabling the creation of an advanced upper body protection system.

### MTB BIONIC JACKET FOR BNS KEY FEATURES:

- Lightweight mesh main construction with breathable padded inserts.
- Strategically placed stretch Lycra panels ensure the vest remains snug and well fitted.
- Slim profiled elbow and shoulder protectors are lightweight yet provide superior impact resistance.
- Both the back protector and chest guard have been engineered for BNS compatibility.
- Soft chest pad features sonic welded TPR reinforcements and is backed with 8mm impact foam for enhanced impact absorption and comfort.
- Ergonomic 5 plate Bionic Back Protector follows the natural curve of the back and features locking plates that reduce the risk of hyperextension of the back.
- The Bionic Back Protector is removable for added convenience.
- Sleeves are connected to the main vest via zippers and can be removed, allowing an alternate vest configuration.
- Integrated kidney belt features thin hip straps to eliminate bunching around waist.
- Locking front zipper ensures secure closure.
- Velcro® adjustment straps with D-ring and TPR puller.
- Elbow protectors are fastened with an X-strap closure for greater comfort and security when riding.
